

REMARKS

Claims 1-10 and 29-37 are currently pending in the application. Claims 11-28 have been canceled. New claim 29-37 has been added. Applicant respectfully submits that no new matter has been added. Applicant respectfully requests reconsideration of the application in view of the foregoing amendments and the following remarks.

The Examiner has identified three inventions. The identified groups are: Group I (claims 1-10), drawn to "a method for assessing risk on a project associated with a change proposal directed towards the project, the project being developed by a service provider for a client", classified in class 705, subclass 10; Group II (claims 11-21), drawn to "a method for determining effectiveness of a project development by a service provider", classified in subclass 7; and Group III (claims 22-28), drawn to "a method for determining satisfaction of client expectation of content of a development project being developed by a service provider", classified in class 705, subclass 7.

In response, claims 11-28 have been canceled. New claims 29-37 have been added such that they falls within Group I. Applicant hereby elects, without traverse, to prosecute the invention of Group I (claims 1-22 and 29-37).

In view of the above amendment, Applicant believes the pending application is in condition for allowance.
